

KRISHI STAR

Social Impact Assessment

Project Outline:

To build upon an initial impact study in Sangli, Maharashtra and revisit different processing units to measure baseline impact, with the objective of monitoring & evaluating impact generated by Krishi Star in farmer engagement. Further, the aim of the project is to publish the findings in an interesting & engaging format.

Team Members:

Aastha Singh, Kishen Shastry KS, Venugopal Rajamani

Client Point of Contact:

Abdul Rahiman (David Nott – briefly)

Project Starting Date:

8th September, 2017

USD 258 Billion
(2015)

USD 482 Billion
(2020 forecast)

Food Processing Industry Size (India)

Project Motivations

**Interest in the agro-business:
one of the key components of
development**

**Need for research
experience in monitoring
and evaluation, and impact
assessments**

**Leverage individual and
team skills**

Krishi Star's Vision

Provide farmers a larger ownership of the value chain

Stabilization and increase of farmer's incomes

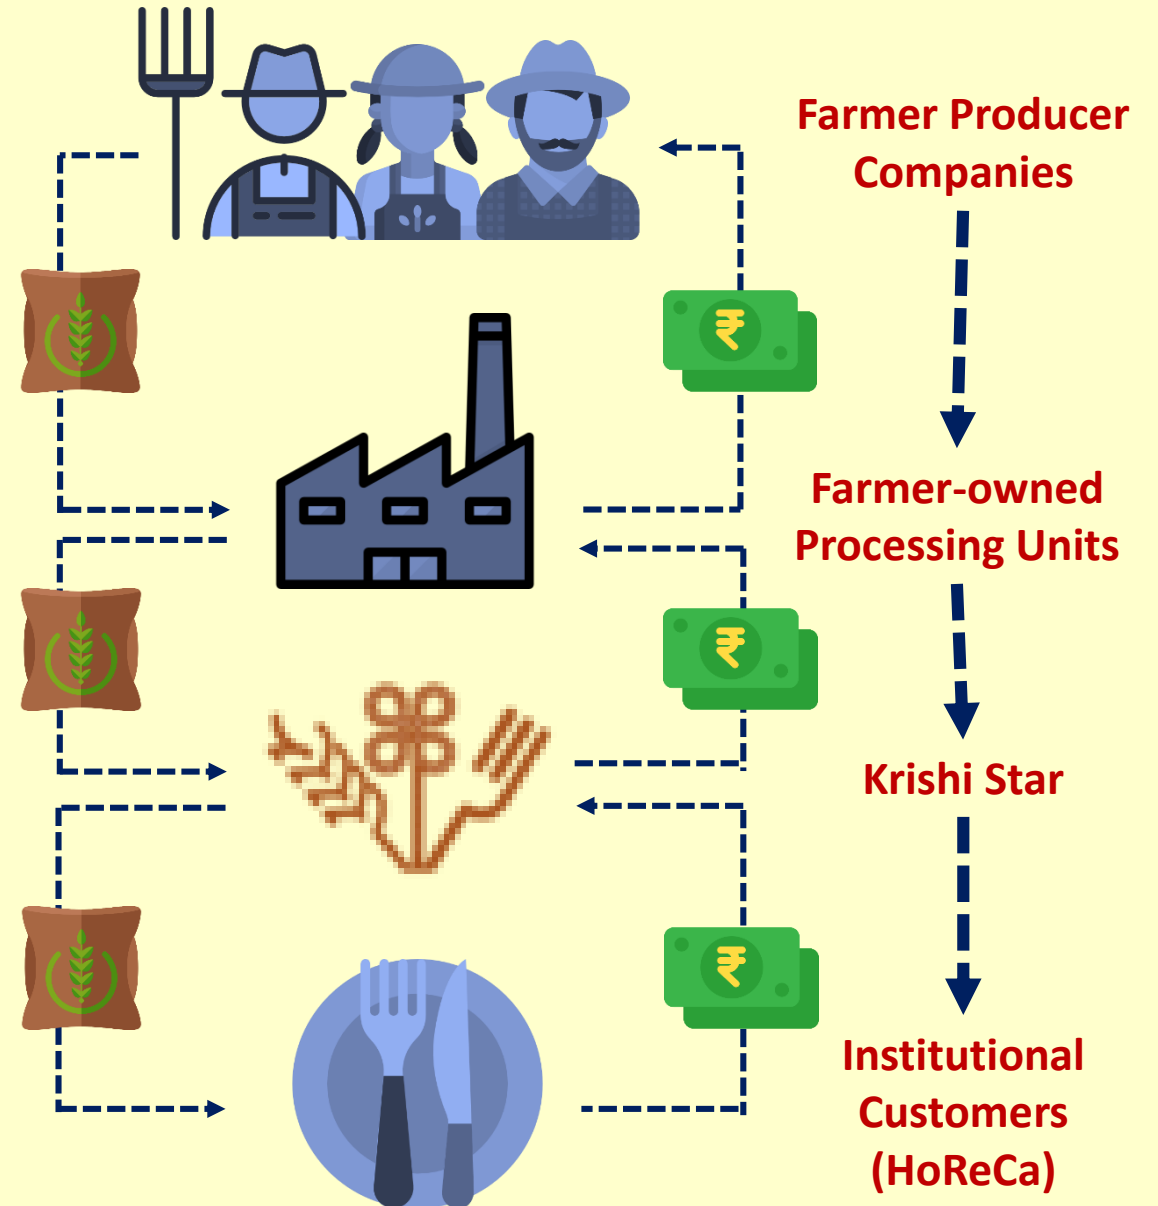

Access to farmers for higher margins

Facilitating farmer-access to higher value markets

Business Model

- **Secondary and Desk Research on Social Impact Analysis**

- **Defining & Developing Metrics**
- **Survey Design**

- **Field Testing of feasibility of metrics – survey executing & findings**

PHASE I

2017

Sept

Desk Research

- Literature Review – (OECD, UNDP HDI et al)
- Indian Institutions like PRADAN's socio-economic impact of its SHGs, ISEC report on Food Processing units in Karnataka
- Ownership structures in general and different cooperative models

2017

Oct

Broad Impact Area
Identification

- Monetary (Wages)
- Quality of life – Health and Education
- Accessibility to information & Markets

2017

Nov

ELM Week - Survey

- Orientation at Krishi Star office in Mumbai
- Travel to Sangli & Surrounding regions
- Surveys administered for Impact Assessment project & Procurement Project

**Meeting with
Cooperative Workers**

Driers in the factory

Tomato Farm

Visiting other farms

**Mapping Alternate
sources of Income**

Drying Tomatoes

Research Findings

17.86%

Contribution of KS operations to capacity utilization rates of processing units

60 days

Incremental days of labour employment generated owing to KS operations

25.00%

Addition to total revenue accruing to sun-dried tomato processing due to KS operations

18.18%

Monetary increase in farmer's incomes traceable to KS purchase requisitions

PHASE III

2017

Mar

2017

Apr

2017

May

Additions to
home

INFERENCE

20% of respondents had
made home improvements
from income due to KS
operations

Furniture

Kitchenware

Additions made to home

Yes No

Furniture Kitchenware

PHASE III

2017

Mar

2017

Apr

Livestock
Purchase

Purchase of Livestock

2017

May

INFERENCE

Almost all respondents reported income from KS operations are channelled into provision of alternate sources of income

PHASE III

2017

Mar

2017

Apr

2017

May

Education

INFERENCE

Low college enrolment rates among workers; however considerable aspiration to educate children observed

Primary

Secondary and
Higher Secondary

Graduation

Schooling levels of employees at the factory

PHASE III

2017

Mar

Home
Additions

Furniture

Kitchenware

INFERENCE

20% of respondents had made home improvements post KS operations

2017

Apr

Livestock
Purchase

INFERENCE

Almost all respondents reported income from KS operations are channelled into provision of alternate sources of income

2017

May

Education

Primary

Secondary and
Higher Secondary

Graduation

INFERENCE

Low college enrolment rates among workers; however considerable aspiration to educate children observed

TEAM DYNAMICS

Kishen

- **Research**
 - On how social impact surveys are conducted
 - Parameters that define a social impact assessment
- **Design Econometrics**
 - Worked out key econometrics to measure social impact
 - Marginalised communities covered, Poor households, Available disposable income
- **Primary Research**
 - Reached out to factory workers exclusively talking Kannada

Aastha

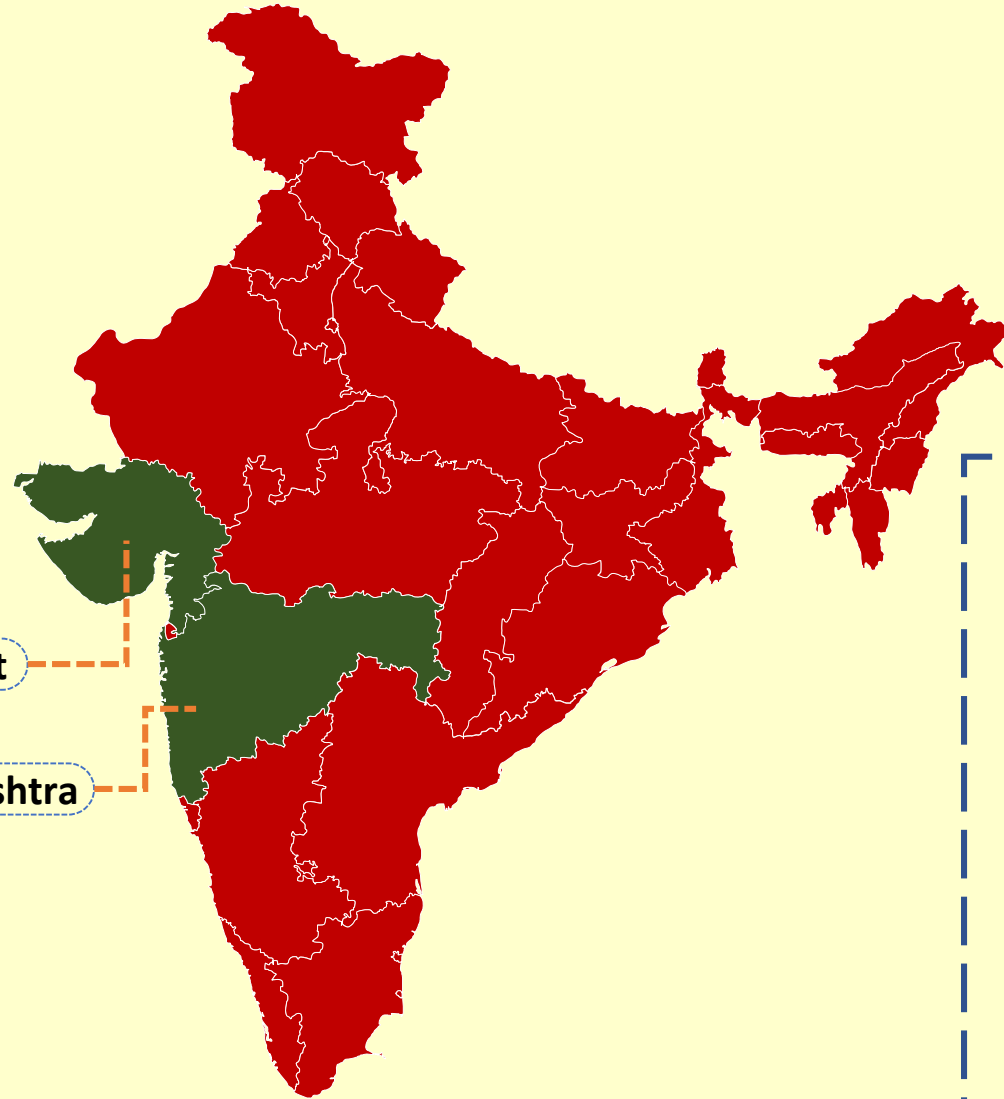

- **Secondary research**
 - “Social and economic impacts of PRADAN’s Self Help Group Microfinance and Livelihoods Promotion Program”, “Documentation of Success Stories of Food Processing Units in Karnataka”
 - Research done on the current trends in the Food Processing Industry and the scope of it
- **Primary research**
 - Assisted on formulating the basic layout of the questionnaire.
 - Reached out to Arjun Uppal for initial suggestions for the progression of the survey.

Venugopal

- **Relationship Management:**
 - Reaching out to agro-companies engaged in similar activities (Jain Irrigations, Science4Society, BlueBlends India, Sahyadri Agro, Varun Agro)
 - Connecting with Upaya Ventures to collaborate and share findings
- **Primary Research:**
 - Conducted interviews of factory workers in Marathi
 - Procuring annual returns & shareholder statements for Krishi Star’s competitors, partners and clientele (MCA 21)

WAY FORWARD

- Evaluating scalability of model tested in Sangli to other areas of KS operations
- Making educated guesses on potential impact KS could have in other states, on achieving scale

CONTRIBUTIONS

- Website coding to present findings in an interactive fashion (logistical challenge)

- Connected Upaya Ventures with Centre for Entrepreneurship for their Accelerator program

CONCLUSION & THANKS

- Farmers face tremendous pressure owing to lack of access to markets, thereby depriving them of sustainable profit margins.

- Social entrepreneurship can solve the dual goal of reducing farmer agony and upliftment of society. Monitoring and evaluation exercises may increase tangible outcomes.
